# WE ARE YOUR PARTNER.

PROVIDING YOU WITH THE BEST SUPPORT FROM THE GROUND UP.  
T H WHITE Groundcare supplies market leading machinery brands for your grounds and arboricultural needs.

**New and Used**  
We supply a variety of high-quality groundcare and arboricultural machinery from a range of industry leading manufacturers.

**Servicing**  
Our engineers offer servicing, repairs and maintenance through our branch workshops or on-site at your venue.

**Parts and Accessories**  
We provide genuine spares, parts and accessories for groundcare and arboricultural machinery from a wealth of manufacturers, as well as supply and fit of parts as required.

**Finance**  
We provide a range of finance solutions and contract service schemes to meet your individual requirements.

We support your business by **understanding sector specifics.**

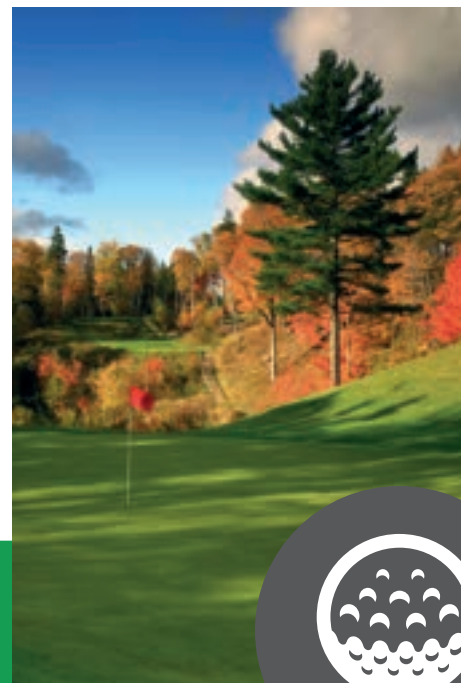

## LOCAL AUTHORITIES

Local government touches the lives of everybody, every day. With increasing economic pressures and regulatory challenges, we know council authorities are dependent on reliable, high-quality and cost-efficient services from their supply chain partners – and the provision of groundcare is certainly no exception.

We have a proven track record in the successful delivery of long-term contracts for several local authorities – including Sandwell Metropolitan Borough Council and Birmingham City Council.

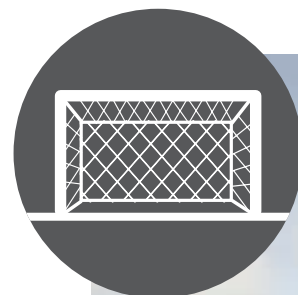

## GOLF COURSES

We understand there are many factors that come into play when keeping your golf course in top condition. Making sure it plays as well as it looks involves maintaining, monitoring and balancing multiple facets – including irrigation, fertiliser application, mowing, rolling and weed removal, to name just a few.

We have partnered with a long list of clubs to supply the best machinery, advice and servicing the industry has to offer – including Redditch Golf Club, North Wilts Golf Club and High Post Golf Club in Wiltshire to name a few.

## EDUCATION & SPORTS RECREATION

High-performance sports pitches demand a specialist approach to care and maintenance – whether part of an educational establishment or a sports-specific, recreational space.

Our wide experience in working with private sector clients across the schools networks and both professional & semi-professional sport, has resulted in a deep understanding of what it takes to create, maintain and manage successful playing surfaces that consistently perform to their very best potential.

## PRIVATE GARDENS & ESTATES

Capturing, enhancing and displaying the individual personality of a private estate is an enormous task – it owes as much to the quality of the grounds, gardens and associated landscaping, as it does to the property itself.

And it's something we're proud to be a part of – having established numerous long-term relationships with estate management teams to date. We think it's a combination of the right machinery, working with the right attachments across the right range of applications. All delivered, of course, with the right advice – ensuring the estate you manage creates the right impression.

## CONTRACTING & GROUNDWORKS

When you're undertaking contractual groundworks and reinstatement programmes, we know it's common for planning to be granted along with the fulfilment of post-construction landscaping treatments.

So whether you need kit to help with turfing, hedging, companion planting for any trees listed in a tree preservation order, or the finishing of green areas adjacent to roads, paths and verges – we can provide the ideal range of equipment, maintenance contracts as well as ongoing servicing and breakdown support.

We support your business by **providing the best machinery.**

Ferris is a proven innovator in groundcare machinery. The company introduced the industry's first-ever hydrostatic drive walk-behind mower and the first patented suspension

system for ride-on mowers, providing greater control to complete tasks more quickly and with ultimate precision of cut.

“Our new fleet of Ferris ISX™ 2200 mowers are hugely impressive. They give us a great quality of cut, they're lightweight, easily manoeuvrable and comfortable – allowing us to achieve a first-class job, quickly and efficiently.”

Renowned for staying ahead of the competition, Ferris has a long-standing commitment to building commercial mowers that work faster and last longer. Packed with innovative technology, each model is also designed to enhance the operator experience. Ferris' full range of commercial mowing, blowing and spreading machines guarantees increased productivity while offering unmatched comfort, durability and cutting quality.

Across their zero-turn, walk-behind and stand-on mower range, patented features include the suspension system, ICD™ cutting system, first-of-its-kind Vanguard oil guard system and innovative engine technology. Working in harmony with the suspension, the mower decks provide greater control, ensuring the perfect cut every time.

Iseki is a leader in ride-on and rotary mowers, as well as compact to mid-size tractors, delivering top-tier performance, reliability, and efficiency.

Designed for professional results, Iseki's superior cut-and-collect mowers offer high performance rotary mowing with a choice of engines and cutting decks. Featuring high-tip collectors and hydraulic emptying hoppers, these machines ensure maximum efficiency in both wet and dry conditions. Ideal for areas where a pristine finish and complete grass collection are essential, they deliver fuel efficiency and exceptional reliability.

"Our new Iseki TH5420 and Wiedenmann Terra Spike is the ideal combination for aerating our pitches at both the training ground and the stadium – helping the team to maintain quality surfaces which players and coaches are very happy with. Comfort for our operators is paramount and these two items tick all the boxes. I am very pleased with the purchase."

Iseki's lightweight compact tractors are powerful and versatile. They offer outstanding performance for professionals and private users alike. Perfect for a variety of applications—from smallholdings and sports pitches to orchards and estates—they accommodate multiple attachments, including mowers, grass collectors, front loaders, sweepers, blowers, and blades. With high horsepower and intuitive controls, these tractors offer incredible versatility and excellent value.

Iseki's best-selling SXG cut-and-collect series machines set the benchmark for efficiency and reliability. Featuring one of the largest hopper capacities on the market and a uniquely designed chute to eliminate blockages, they provide an exceptional cut every time.

Experience the Iseki difference—where innovation meets performance.

Since 1914, The Toro Company has been a global leader in outdoor power equipment, trusted in over 125 countries at top venues like St. Andrews and Wimbledon.

Toro delivers innovative solutions for turf management and T H WHITE proudly supplies Toro's high-performance grounds equipment range with an aftersales remit to service both Golf and Grounds equipment.

Toro brings you rotary, cylinder & flail mowers for every need, featuring heavy-duty steel decks, all-wheel drive traction, and electric-powered options – machines that excel in tough conditions while offering sustainable solutions.

Flail mowers, like the Toro LT-F3000, handle dense vegetation with Tempest™ flail blades, ensuring a clean cut and healthier regrowth. Cylinder mowers, such as the LT3340, deliver precise, scissor-like cuts for fine turf.

Rotary mowers, including the Groundsmaster 3300 (also in e3200 electric model) and ProLine H800, combine power and traction for a flawless finish in any terrain.

We also supply the Toro Vista and Workman models in their Utility vehicle range. The all-

electric Toro Vista offers a smooth, comfortable ride with seating for up to eight, ample storage, and fold-down cargo space. Built on Toro's trusted Workman frame, it's designed to move people and gear with ease. The lithium-ion Toro Workman GTX is lighter, more efficient, and built for big jobs. With nearly 400 pounds (181.4 kg) less weight than the diesel model, it improves productivity while minimizing turf impact. Its maintenance-free power packs ensure reliable performance.

From lawn to meadow maintenance, Amazone design and manufacture leading ‘cut-and-collect’ mowers and scarifiers.

The self-propelled Profihopper models mow and scarify in a single pass, offering a unique collecting and compacting system – ideal for dust-free collection. In short or long grass, damp or dry conditions, these machines have large working widths, all-wheel drives with zero turning circles. Thinning the surface, they remove thatch, creating a light, air, water and nutrient exchange to improve soil structure to enhance growth.

Mowing, scarifying, collecting, chopping and rolling is the universal operation of the mounted Amazone Groundkeeper – the year round helper takes on intensive greens maintenance in Summer and collects Autumn’s dead leaves, however high they pile up.

“Even when we bought our first Amazone years ago, the technology was market-leading and it moves on with every upgrade. It does everything we need it to do – from picking up leaves to clearing debris, cutting semi-rough, shredding collections, and all while delivering a first class finish which we know is the pride of every groundkeeper.”

Ventrac compact tractors are light and nimble over land contours, whilst powerful and agile in use – providing exceptional operator safety.

More than 30 front-mounted attachments mean the Ventrac is highly flexible – the quick-change functionality allows you to turn your unit into a contour mower, a flail mower, aerator, leaf blower, snow clearer and more, in minutes.

The latest models include a flex-frame, which allows the tractor to articulate and oscillate, providing enhanced operator comfort when crossing undulating terrain. Improved stability is assured via all-wheel-drive and twin-wheel options, allowing safe working on 30° slopes.

“My vision for the aesthetic appearance of the estate has been fulfilled with significant help from two Ventrac all-terrain compact tractors and a wide array of attachments.”

Renowned for their high quality UK built products, Wessex have manufactured compact tractor attachments and groundcare machinery since 1962 – everything from rotary, flail and roller mowers, through to toppers and paddock sweepers.

The CRX MultiCut series of rotary mowers is truly multi-functional – used either as a professional roller mower with full width front and rear rollers, a finishing mower with 4 fully castoring wheels, or a combination of the two, with castoring wheels on the front and roller on the rear. The CRX also mulches, adding to it's versatility.

Wessex out-front flail mowers offer increased operator comfort over rear-mounted machines – providing increased visibility and manoeuvrability in confined areas.

“ The investment in the Wessex CRX 180 has been an inspired decision for Bromsgrove Sporting. We're more efficient, more consistent and receive better feedback all-round – the pitch is in the best condition possible.”

The ability to maintain your turf in a more sustainable way is at the forefront of Maredo's design process – allowing you to complete more tasks using less power.

Maredo specialise in independent, cassette-mounted attachments – fixed to a central Mframe and then connected to either a power unit, a triple green mower or a compact tractor.

The GT series attachments connect to triple green mowers, the MT series mounts to compact tractors, and the ST series is a range of innovative self-propelled and multifunctional machines.

The STrac 700 is a truly versatile, multifunctional machine, with the central power unit acting as the 'tool-carrier' for the ST heads. When added, they create either a Verticutter, a Vibedisc seeder, a Vibespike aerator or a Flexfrazee mower.

Sold from our depot in Stockbridge, the Case IH Farmall range provides the perfect workhorse for year-round capability – with engines and transmissions that punch above their weight.

The three tractors in the Farmall 55-75 A series are entry level models, but that does not mean they are short on specification or comfort. As the series name suggests, these compact tractors come with three power ratings – 55, 65 and 75hp – and are available with or without cabs. Ideal for smaller operations, specialist applications or where a lighter weight is needed, two and four-wheel drive options are available.

Moving up the range, power ratings 85, 95, 105 and 115hp provide economical 12x12 mechanical shuttle or a 12x12 hydraulic PowerShuttle making for predictable and safe manoeuvring, especially during loader work.

The Farmall C range boasts seven models from 58 to 114hp benefiting from upgraded features, including optional Multicontroller armrest, higher 4,400kg lift capacity, three-speed PTO and a loader-ready package as standard.

## Remote-controlled Slope Mowers | Power Arms

LOCAL  
AUTHORITIES

CONTRACTING &

PRIVATE  
ESTATES

Packed with innovative features, the Belrobotics 'Big Mow' and 'Park Mow' simply do the hard work for you. Managing the cost of turfcare today is critical – and professional automowers (robots) can have a big impact on annual spend.

Reliable, always available and supportive of flexible work schedules in all-weather conditions. Adding GPS RTK (real-time kinematic) connectivity, triples mowing capacity by increasing the accuracy of GPS systems. You can manage just one unit or an entire fleet through an app for tablet or smartphone.

Each model has an anti-theft solution, GPS location & geofencing alerts, and an in-built maintenance history. Safety is paramount – with 5 sonars able to instantly deactivate cutting systems if they encounter unexpected obstacles.

We support your business by  
**supplying an unrivalled parts & aftercare service.**

## PARTS THAT DO THE JOB

Established in 1989, we have enough experience to understand the importance of a strong line-up of supplier brands – together with the quality of their original parts.

Our technicians are manufacturer-trained, so their parts 'know-how' is second to none. Combined with an outstanding back-up service – whether you choose a dedicated plan or pay-as-you-go – we'll always supply the right high quality part for the job. On time, every time.

## SERVICE THAT SETS THE STANDARD

Our focus is always on answering your needs. We'll ask the right questions to guarantee the right outcomes. No hidden costs, no reliability concerns – a dependable back-up support, and a promise to consistently meet high standards.

We pride ourselves on our integrity and we hope our track record in maintaining long-term relationships with our customers speaks for itself.

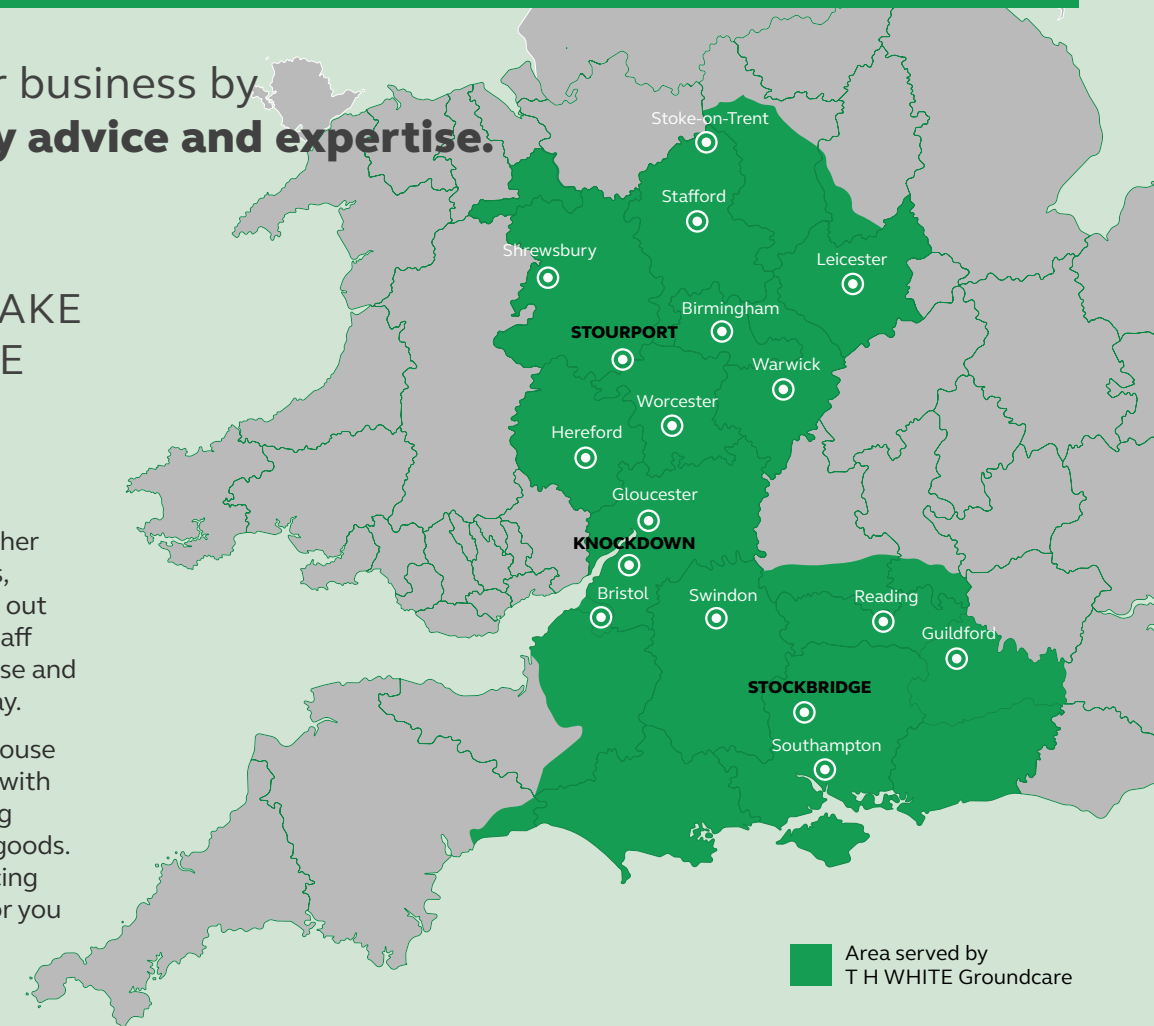

REGULAR  
SERVICING  
FOR MAXIMUM  
PRODUCTIVITY

We support your business by  
**offering friendly advice and expertise.**

## PEOPLE THAT MAKE THE DIFFERENCE

Many of our sales reps are either ex-customers or ex-operators, with an understanding borne out of genuine experience. Our staff bring passion, energy, expertise and commitment to work each day.

We also employ our own in-house finance managers, who work with some of the industry's leading finance providers for capital goods. Our aim is to make the financing process as easy as possible for you by keeping it all in house.

## THE KIT • THE PARTS • THE SERVICE • THE ADVICE

- We follow systematic procedures from standards set by manufacturers
- Our workshops are well-equipped with advanced diagnostic tools
- Our technicians are manufacturer-trained in all aspects of maintenance and servicing
- We offer an apprenticeship scheme, training the next generation and investing in the future
- Our workplace is clean and well organised
- Our comprehensive parts departments stock genuine parts
- We undergo regular manufacturer inspections to retain skilled 'authorised' dealer status
- Our mission is to satisfy customers ensuring you can be assured of great service!

But don't take our word for it, hear how our customers describe their experiences in dealing with us:  
*'Friendly, reliable, go the extra mile, above and beyond, technically competent, trustworthy, honest.'*  
Enough said, we think!
